American and English Grown TULIPS

The outstanding feature of American grown Tulips is that they are earlier flowering than the Dutch or English. Because of this early flowering, the blooms last considerably longer in the garden as they bloom before the late hot May sun appears. English Tulips have an interesting feature in the fact that the bud opens all at once so that the flower attains its full size immediately upon opening. The color of English Tulips is deeply intense. It is our truthful opinion that both the American and English Tulips "beat the Dutch." All top size bulbs.

f. denotes best varieties for forcing.

xx can be had pre-cooled for extra early flowering. Add \$1.00 per 100 for pre-cooling.
